

REACH Declaration

Date: 12/01/2023

Under REACH, products supplied by Polycase are considered “articles”. An article as defined by REACH is “an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition.” Polycase articles do not involve the intentional release of substances. Accordingly, we foresee no registration, pre-registration, or authorization requirement for products we supply. In addition, we have not been notified by our suppliers of any raw material withdrawals concerning our products.

Currently, the European Chemicals Agency (ECHA) identifies Substances of Very High Concern (SVHCs) as potentially harmful. In accordance with Article 33 of REACH, it is our duty to communicate if the presence of SVHC is in excess of 0.1% of the article weight.

Polycase products do not contain any SVHC in quantities totaling in a concentration equal to or above 0.1%.

- Exceptions are DC, HD, ML, ZH, and ZQ series of enclosures which contain the SVHC lead in excess of 0.1% article weight in the brass inserts.

We are disclosing the above information based on data from our suppliers. We do not test for these substances. We do certify that we do not intentionally add or use these materials in the manufacture or handling of our products.

We hope you understand that from a point of workload and efficiency, we cannot answer each questionnaire individually.

Please contact us with any questions you may have.
