

**Dear Valued Customer,**

**Subject: REACH Compliance Declaration**

Thank you for selecting POLYCASE. We are pleased to provide the following information regarding Polycase products.

Under REACH, the product supplied is considered an “article”. An article as defined by REACH is “an object which during production is given a special shape, surface or design which determines its function to a greater degree than does its chemical composition.” We do not manufacture “substances” or “preparations” and our articles do not involve the intentional release of substances. Accordingly, we foresee no registration or pre-registration requirement for products we supply.

Based on information provided to Polycase by its suppliers, Polycase products do not contain restricted substances as intentionally added components or as expected process impurities above corresponding threshold limits shown in the below table.

**Restrictions related to REACH-SVHC directives:**

<b>Reference Detail/Reference Regulation</b>	<b>Restricted Substances</b>	<b>Threshold Limits (% W/W)</b>
Registration, Evaluation, Authorization and Restriction of Chemical (REACH) Substances of Very High Concern (SVHC)# (Ref : Regulation EC 1907/2006)	- As defined at: <a href="http://echa.europa.eu/candidate-list-table">http://echa.europa.eu/candidate-list-table</a> (updated on <b>12-Jan-2017</b> )	0.1 each

We are disclosing the above information based on data from our suppliers. We do not routinely test for these materials. We do certify that we do not intentionally add or use these materials in the manufacture or handling of our products.

We do hope you understand that from a point of workload and efficiency, we cannot answer each questionnaire individually.

We look forward to continuing to work with you. Please contact us with any questions you may have.
